- [Resolution](#)

Symptoms

There is an occasional conflation of the ISO 19157 standard and the quality measures within ISO 19115-2

Cause

The major cause of this is that ISO 19157, presents greater potential for describing quality while not necessarily making apparent whether ISO 19115 should still be used.

Workaround

It is recommended that 19157 be utilized to measure quality into the future. The ISO 19115 quality measures may, in places, fail to fully characterize quality.

Resolution

It is recommended that 19157 be utilized to measure quality into the future.

```
<osuser key="osuserRepository" name="OSUser Repository"/>
```

```
<hibernate name="Hibernate Repository" key="hibernateRepository" description="Hibernate Repository" cache="true"/>
```
